Our gas bottle is an ASME stamped, seamless pressure vessel that is used to safely hold high pressure gases or liquids. We stock several different models for rapid delivery, and we can also custom-manufacture similar vessels with a wide variety of volumes and connection sizes. Available in carbon steel or stainless steel, with or without special coatings and other options. Contact us for a quote and more information.

Part numbers above are standard carbon steel. Items are available with stainless parts and a variety of coatings. Also available in top repairable style with ports at each end. Custom 10K designs are also available.

¹ Only the standard option shown; we have many more connections available.

### COMPONENT PARTS

1. Stem
2. Shell
3. Port Assembly
Our double-necked gas bottle is an ASME stamped, seamless pressure vessel that reduces leak points and maximizes usable volume. We stock several different models for rapid delivery, and we can also custom-manufacture similar vessels with a wide variety of volumes and connection sizes. Available in carbon steel or stainless steel, with or without special coatings and other options. Contact us for a quote and more information.
